## **WORK EXPERIENCE**

Star Lab - Intern

- Developed innovative ideas and techniques to enhance client and employee experiences.
- Created WordPress plugins to streamline interactions, leveraging ReactJS for front-end logic and PHP as a back-end translator.
- Built web scrapers to collect valuable data, automating direct input to the company's Airtable database.

Weston, FL  
Oct 2024 - Current

Classic Brass Works - Project & Production Manager

- Purchased and installed 11+ work stations that consisted of QR scanners, Label printers, mini-CPUs, and monitors for welders. Point of contact for any issues that needed IT troubleshooting. Assisted with website development and quickbooks integration.
- Directed the end-to-end process of projects, overseeing estimation, project management, production management, safety, and revenue generation totaling \$2.2 million, with a team of 6-10 metal fabricators.
- Spearheaded initiatives aimed at enhancing production capacity, efficiency and safety such as implementing SOPs, supplying employees with the hardware.

Fort Lauderdale, FL  
May 2023 - Feb 2024

Manhattan Construction Company - Project Engineer

- Served as the primary point of contact for multiple projects totaling a value of \$20 million.
- Managed project schedules and coordinated subcontractors, ensuring efficient workflow.
- Guided a 14+ government board through project conflicts, recommending solutions for expedited decision-making.

Marco Island, FL  
Jun 2021 - Sept 2022

ECS Limited - Assistant Project Manager

- Formulated and led training sessions focused on concrete testing and foundational inspections, improving the skills of 10 team members; the training resulted in enhanced compliance awareness and reduced error rates by 25%
- Managed and trained new recruits, offering essential guidance for their success through training sessions and effective communication.
- Delivered detailed reports to clients tailored to their specific requirements.

Fort Myers, FL  
Dec 2019 - Aug 2020
